### SureCav Cavity Spacer System

SureCav has been developed to take the place of a backing block when building stone, brick, flint or slate walls. It will save you money, guarantee clean and moisture free cavities and create 5% extra internal floor space with narrower footings.

**SureCav is a Cavity Wall Spacer System, BBA Approved 04/4154**

- Significantly reduces labour and material costs
  - Gives a faster, cleaner build
  - Reduces the width of foundations by 100 mm
- Guarantees absolute integrity of the cavity: SureCav guarantees clean, moisture free cavities that also stop water penetration from wind driven rain in any exposure zone with a 50 mm. cavity
- Environmentally friendly: Light weight and easy to transport, SureCav is 80 times lighter than 100 mm. concrete backing blocks
- Gives an extra 5% floor space when original external dimensions are used
- Durable and remains effective for the life of the building
- SureCav holds insulation in place ensuring it works to its full efficiency
- SureCav is now being used by forward thinking builders nationwide to significantly reduces labour and material costs

40 tonnes of 100 mm. Concrete Blocks

Same wall area of SureCav as Blocks shown on the left

**SAVE TIME & MONEY**
